

DEF CON 20

Wireless Network

<http://DefConNetworking.org>

There are 2 WiFi Networks

DEFCON-SECURE

Secured using WPA2 & 802.1x
(secures OTA transmission)

We tunnel your device to the
DEF CON servers and Internet
ONLY – no peer-to-peer
communication allowed.

Use it like you would at home
or work – but you're still on
the Internet, surf safely!

DEFCON (802.11b/g)

DEFCON-A (802.11a)

Open wireless, no OTA security

Peer2peer comms allowed

It's your "sandbox" to play
with – enjoy!

(Don't attack the wifi, please)

Register for DEFCON-SECURE

Go to <https://wifireg.defcon.org/>

- Available via laptop or 3G/smartphone

Register a username / password

- Don't use your online banking login, please!

Download & install the 802.1x certificate

- Instructions on the website above

Connect, login, surf. *(in that order)*
